## Aims & Scope

Current Neuropharmacology aims to provide current, comprehensive/mini-reviews. The reviews cover the fields of molecular, cellular, and systems/behavioural aspects of neuropharmacology and neuroscience. Moreover, position papers and research articles/clinical trials of great novelty and scientific interest might occasionally be considered for publication, along with guest-edited issues in all areas of neuropharmacology and neuroscience.

The journal serves as a comprehensive, multidisciplinary expert forum for neuropharmacologists and neuroscientists.
