## Aims & Scope

In recent years, a breakthrough has occurred in our understanding of the molecular pathomechanisms of human diseases, whereby most of our diseases are related to intra- and intercellular communication disorders. The concept of signal transduction therapy has become the forefront of modern drug research, and a multidisciplinary approach is being used to identify and treat signaling disorders.

The journal publishes timely in-depth/mini-reviews, research articles, and drug clinical trial studies in the field of signal transduction therapy. Thematic issues are also published to cover selected areas of
