Aims & Scope

Current Bioactive Compounds aims to provide full-length/mini-review articles as well as research papers on new bioactive compounds with proven activities in various biological screenings and pharmacological models, with a special emphasis on stereoselective synthesis. The aim is to provide a valuable information source of bioactive compounds, either synthesized or isolated, which can be used for further development of pharmaceuticals by industry and academia.

The journal should prove to be essential reading for pharmacologists, natural product chemists, and medicinal chemists who wish to be kept informed and up-to-date with the most important developments on new bioactive compounds of natural or synthetic origin,
