Editor-in-Chief
Jose Luis Burguera, Venezuela

ISSN: 2212-7968 (Print)
ISSN: 1872-3136 (Online)

Aims & Scope

Current Chemical Biology aims to publish full-length and mini reviews as well as research papers on exciting new developments at the chemistry-biology interface, covering topics relating to chemical synthesis, science at the chemistry-biology interface, and chemical mechanisms of biological systems.

Current Chemical Biology covers the following areas:

Chemical Synthesis, including the synthesis of biologically important macromolecules, such as proteins, polypeptides, oligonucleotides, oligosaccharides, and others; asymmetric synthesis; combinatorial synthesis; diversity-oriented synthesis; template-directed synthesis; biomimetic synthesis; solid-phase biomolecular synthesis; synthesis of small biomolecules like amino acids, peptides, lipids,
